USB Stick RTR09

The Easywave USB Stick RTR09 is a bi-directional radio module (transceiver).

In combination with a user-defined Software and a PC / touch panel, it may be used to realize certain controlling and managing tasks.

The required software is not included in the scope of delivery, it has to be developed by the user.

Depending on the application, a user-defined number of transmitter codes may be taught into the Easywave USB Stick. Beyond this, the RTR09 has 64 hard-coded transmission-codes available for controlling several Easywave receivers.

With that, the RTR09 is perfectly suited for managing and monitoring even complex buildings.

RTR09E5001-02-41K

Technical Details

System Requirements	Windows Vista/XP/7, CD-ROM-drive, USB port (1.1 compatible)
Coding	factory coding with 64 Easywave Telegrams
Channels / Frequency	64 / 868.30 MHz
Range	up to 150 m under favourable open field conditions
Power Supply	USB port
Operation Modes	defined by user-specific software
Function	depending on user-specific software
Degree of Protection	IP20
Operating Temperature	0 °C to +40 °C
Dimensions	24 x 75 x 8 mm
Weight	13 g
Color	translucent turquoise blue similar to RAL 5018

Scope of Delivery

- USB Stick
- Operating Manual

Models

Product Key	Description
RTR09E5001-02-41K	USB Stick 64-channel, translucent turquoise blue
